

T-DRILL

PRODUCTIVITY AS A PRODUCT.

NEW!

WELDING MACHINE

New innovative machine for demanding quality welding of tubular parts

T-INWELD

New addition to the T-DRILL product family: a welding machine for demanding cylinder internal welding

Take your production to a new level with T-DRILL T-InWeld. The welding machine completes our product family and makes the welded seams even smoother.

This patented **T-DRILL T-InWeld Welding Machine** combines diverse parts into components that efficiently handle and assemble flows. It is designed for demanding quality welding of tubular parts and can work with both straight and curved seams.

Because the welding is done from the inside in an automated process, the result is always a precise and smooth surface. That makes T-DRILL T-InWeld perfect for industries where the inner surface quality and the flow characteristics are critical: e.g. food-, pharmacy-, chemical-, and semiconductor industries.

T-DRILL T-InWeld works well with special applications like tube inside a tube and does high-quality seams even to those challenging parts which cannot be manufactured with conventional manufacturing methods.

The welding machine is fully compatible with T-DRILL collars.

Key Features:

- High quality seams with internal welding
- Automated welding process
- Patented technology
- Precise and stable results
- Designed for demanding quality welding of tubular parts
- No thinning of wall thickness
- Suitable for batch and serial production, as well as special applications
- Excellent flow characteristics in the end result

Technical data

T-DRILL T-InWeld	
Tube inner diameter	Ø10 - 114,3 mm
Materials	All materials suitable for TIG welding
Wall thickness	0,6 - 3 mm
